Colourful & DUTCH since 1984

There's green flowing through our veins

Artificial grass. It's been in our genes for more than 35 years.

Edel Grass is a worldwide operating, innovative and leading company, creating artificial grass solutions for sports and landscaping purposes beyond borders. Thanks to our experienced people, a rich history, extensive knowledge and qualified partners, we've earned our place in thinking, supplying, and building artificial grass projects all over the world.

Nice to meet You!

The Hague, The Netherlands

The company behind the colour

- Artificial grass producer since 1984
- Founded as family owned company in 1918
- 100% acquired by Antea Group in 2016
- Based in the carpet manufacturing capital of Holland

- Experienced & dedicated people
- Developer of innovative grass systems
- Recreational to top sport use solutions
- Preferred producer for leading int. sports federations

Partners & clients worldwide refer to Edel Grass as one of the most reliable and enjoyable companies to work with.

Würenlos, Switzerland

Keys to our success

Commitments to make you win

Loyalty

Collaborating with experienced and loyal partners worldwide is the basis of our success. Edel Grass is loyal to her partners.

Performance

Our systems and products are developed by users and experts. They are produced for optimal performance. We choose quality.

Expertise

We've been around since 1984. We gained extensive knowledge and know which factors are key to successfully finish any artificial grass project.

Innovation

We participate in pioneering alliances that innovate our business and develop durable solutions beyond the existing.

100%  Quality – Made in The Netherlands

Grand Rivière, St. Lucia

Preferred by world's leading sports federations

> edelgrass.com

We built worlds 1st FIFA** certified field in 2005 and have been a FIFA Preferred Provider ever since. Currently there are only 7 FPP's worldwide.

As an FIH Preferred Supplier, Edel Grass meets the strict FIH Quality-Assurance Programme conditions for producing and building hockey fields.

The intense sport of Rugby demands for an outstanding and safe surface to play on. Edel Grass is Preferred Producer for WR and provides without compromise.

The International Tennis Federation is the world governing body of tennis. Edel Grass develops and produces tennis courts meeting ITF standards.

The best alternative to NATURE

excellence

Our sports grass systems, suitable for various applications, all exceed our demanding quality standards and stand out from the crowd.

Sports Grass

Edel Grass has an extensive artificial grass collection for sports applications. All 'Made to win!' Our in-company R&D department gives us the ability to design, produce, test, and refine our artificial sports grass systems.

They are designed to offer high-quality use during their entire life span. We strive to deliver systems that perform in any climate and can be used in all weather conditions. Therefore, we only use materials of the highest quality and work with suppliers that can meet our demanding quality standards.

CHARACTERISTICS

- The best alternative to nature
- Year-round performance
- Uniform playing characteristics
- UV-stable & extremely durable
- Clear maintenance planning

SUSTAINABILITY

- Ecologically responsible produced
- Safe to people & environment
- Meets the strictest environmental guidelines
- Produced with recyclable materials
- Avoids risk of soil contamination

APPLICATION & USE

By involving us in your activities in an early stage, we are able to share our knowledge with you and help you approach your project the right way. We strive to be your partner, to support you in successfully building your projects.

SOCCER systems *made to win*

The people's sport

Already at the beginning of the last century, 'the dribbling game' with the sole rule of stopping the ball by hand and then moving it forward with the foot, was played all over England on lawns, sandy surfaces, or just on the street. It doesn't need further explanation that in these days, the game of soccer was a rough game with many injuries.

Nowadays the sport itself as well as the soccer surfaces have improved strongly. Artificial turf for football has gone through a real revolution since the 1960s. At first mainly was looked at the practical advantages of artificial turf compared to natural grass. Nowadays optimal playing characteristics in all weather conditions, preventing injuries and making players better are the most important principles of a soccer field.

Quality – Made in The Netherlands

Edel Flashblade

*Sand – SBR-filled
Built on lava stone sub-base*

Economic and durable soccer field
Flexible flash yarn shape
Good grip and torsion properties
Optimized ball roll speed and behavior
Certified systems

Edel Flashblade

Performance-filled

AFFORDABLE PERFORMER FOR MULTI-USE & INTENSIVE PLAY

Our Flashblade yarn fulfills the needs when a competitive soccer field system according to FIFA standards is required. With its 12.000 Dtex and matt finishing, Edel Flashblade perfectly covers performance infill and gives the field an outstanding natural look. Due to its flash-shaped yarn, the piles stay upright when played intensively.

Sand – Cork-filled

Edel Hybridblade Performance-filled

MAINTENANCE-FRIENDLY FIELD WITH NATURAL ESTHETICS

A mixture of diamond shaped yarns and tape. When a soccer field has to have good esthetics besides excellent performing capabilities, Edel Hybridblade delivers. It offers perfect conditions for cork-filled systems. The combined yarns and a high Dtex of 18.200/7, make sure that the infill stays in place and excellent wear and tear is provided. On top of that, Edel Hybridblade offers a maintenance-friendly soccer system.

Šiauliai Arena – Lithuania

*Semi-permanent Edel Infill Free soccer
field installed with Velcro seams*

'INFILL-FREE' systems made to win

Skip the hassle Just play

excellence

- Lower maintenance costs**
- No granulate performance infill**
- Minimal cleaning efforts**
- No static electricity**
- Perfect draining capacities**

An infill-free grass system offers a fair amount of all the playing characteristics found in performance-filled systems. They however come with a big advantage, which is the lack of performance infill such as SBR, TPE, EPDM and/or cork.

Not having to fill the system with granulate, only occasionally with stabilizing sand, leads to fast and affordable installing possibilities. Logically this also leads to a deduction of maintaining costs worth mentioning.

Edel Novum

3D view

Edel Novum

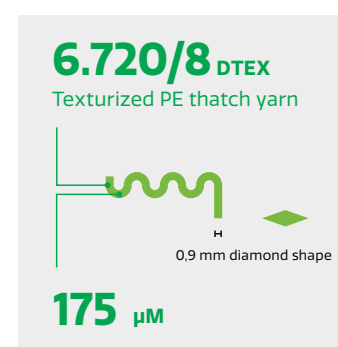

Infill-free

ECO-RESPONSIBLE INFILL-FREE AND NATURAL PERFORMING SOCCER SYSTEM

Edel Novum is a unique and true non-infill soccer system based on a new combination of three yarn types. Designed to perform under any condition with excellent ball roll and constant ball speed. Edel Novum offers built in shock absorption and a natural playing experience. Turning, passing and tackling are possible in a most natural way, preventing the risk of injury as much as possible and putting player safety as highest priority.

- Diamond/triangle shaped yarns
- Texturized thatch yarn
- Natural tri-color green
- Glass fiber reinforced backing
- Elastic layer sub-base required
- Stabilizing sand recommended
- Din/EN/RAL approvals

HOCKEY systems *made to win*

The family game

A field hockey-like game was first played in Greece around 300 BC, where players hit a ball with horn 'sticks'. Over the centuries similar games were played worldwide and it became known as 'the game played with sticks'. The word 'hockey' itself originates from the English word 'Hook'.

Modern hockey found its way through English public schools in the early 19th century, where it was played on natural grass. The striking circle was introduced and the rubber cube was replaced by a ball. Since the early 70s artificial hockey turf changed the game drastically because of the increased ball speed. Over the last decades, hockey evolved more and more as the sport played and enjoyed by all generations and the entire family.

100%  Quality – Made in The Netherlands

TENNIS systems *made to win*

Just hit it

Tennis evolved from a French ball hitting game called 'jeu de paume'. It was king Louis X of France, a fanatic player, who built the first modern style indoor court in the 13th century, which was later copied in palaces across Europe. Around 1600 the racket came into use and the game got its name from the French word tenez ('hold').

During the 18th and 19th century 'lawn tennis' gained popularity and the game developed. The lawn mower was introduced and now grass could also be used for tennis courts. In 1872 the first tennis club was founded in Leamington Spa, England. Modern tennis is played on a variety of surfaces such as grass, clay, and hard courts. Nowadays, artificial grass is intensively applied and one of the most used tennis surfaces.

Edel Advantage Red Court

All-weather red sand-filled high-performance tennis surface

Built on bound or unbound sub-base

Edel Advantage Red Court Red sand-filled

ALL-WEATHER COURT, THE ULTIMATE ALTERNATIVE TO CLAY

Combining the playing characteristics and appearance of clay with the benefits of an all-weather playing surface, Edel Advantage Red Court (ARC) has only to be installed on a stable, free draining base. There are no requirements for watering the surface, so the high costs of a sprinkler installation are avoided. As with traditional clay courts, Edel ARC allows players to slide in a controlled motion allowing coverage of the whole court area.

- **Natural looking court**
- **Playing characteristics of clay**
- **No sprinklers or water needed**
- **Visible ball prints**

Padel court

PADEL systems *made to win*

The 2 vs 2 fun game

Padel saw daylight in Mexico in 1969. Since then, it became popular in several countries in south America, such as Argentina. In Europe, padel was first and mainly practiced in Spain. Recently it gained much more popularity in Europe as well as in other continents.

The racket sport padel is mostly played in couples of two against two on an enclosed court of steel and glass. The field is 1/3rd the size of a tennis court. The game style and rules of padel differ from and cannot be confused with paddle tennis, which is mostly played on courts in USA and Canada. For more information visit PadelFIP.com.

100%  Quality – Made in The Netherlands

Edel Padel XT Club

Reflex blue sand-filled padel system

Built on bound sub-base

Edel Padel XT Club Sand-filled

THE ALL-WEATHER SOLUTION FOR EVERY PADEL COURT

Edel Padel XT Club is suitable for all-weather padel courts and can be customized to every single location. The perfect stability, optimal playing properties, and slide conditions make the system perfect for padel courts at any club. It will require relatively low maintenance. The combination of the sub-base, yarn and sand infill results in a system with good water permeability and a uniform and predictable ball bounce.

RUGBY systems *made to win*

The intensive team sport

The exact origin of modern rugby is complex. A first form was played in France in the Middle Ages called Soule or Sioule. At the beginning of the 18th century, a kind of football was played at a school in Rugby, Warwickshire, where points had to be scored by holding the ball under the arm. Rugby was introduced to many schools in England in the 19th century and the sport gained worldwide fame.

Rugby is an intensive contact sport in which a good surface is important to prevent injuries. When talking about rugby, people mostly refer to Rugby Union, which is played in leading countries. Generally speaking, a rugby field always consists out of long grass fibers filled with sand and performance infill, built on a shock-absorbing sub-base.

100%  Quality – Made in The Netherlands

Edel Flashblade

Sand – SBR-filled rugby system built on shockpad and bound or unbound sub-base

Edel Flashblade

Performance-filled

AFFORDABLE PERFORMER FOR INTENSIVE USE & PLAY

The Flashblade yarn fulfills the needs when a competitive rugby field system according to World Rugby standards is required. With its 12.000 Dtex and matt finishing, Edel Flashblade perfectly covers performance infill and gives the field an outstanding natural look. Due to its flash-shaped yarn, the piles stay upright when played intensively. Built on a shockpad, the system complies with the requirements for rugby applications.

Multi SPORT systems *made to win*

From talent to pro

The general term 'sport' with which this modern form is indicated, originates in England. This is stated as most world languages have a term derived from sport such as: spor, desporter or deport, and because many technical sport terms can be traced back to English. Sport is now spread across the world.

For a long time the meaning of sport was underestimated. Since the last century, the importance of sport in societies has been valued right. Sport connects and brings people together. It provides fun and relaxation and with sports people can compete in a healthy way. Sports fields and good surfaces are indispensable in this. Synthetic turf (multi) sports fields are ideal for this purpose and therefore meet an important global need.

Edel Base

*Olive green sand-filled multiuse court
Built on bound or unbound sub-base*

Edel Base Sand-filled

STRONG AND AFFORDABLE SPORT PRODUCT FOR MULTIUSE

Edel Base is the most economic multisport product we offer. It is developed solely for (urban) playgrounds and multisport pitches of different sizes. The low density requires a fair amount of stabilizing sand fill. The sand filled field is perfectly playable for players in all levels and can be enjoyed in- and outdoors, all year-round. If you need to realise a strong and robust multisport field against a limited budget, Edel Base is the product to choose.

- Low density budget product
- Stabilizing sand for performance
- Strong fibrillated XT yarns
- Roll width incl. white line

excellence

Low pile height for multiuse
Robust against wear and tear
Good characteristics during lifespan
Playable for players in all levels
Suitable for in- and outdoor use

**roll width
407 cm¹**

Length according to
installation schedule.

Landscaping GRASS made to relax

Environments for life

We're all keen to enjoy life as much as possible. Quality time is what it's all about. Of course, everyone interprets quality time in very different ways.

For some, true relaxation means having an attractive, maintenance-free 'grass lawn' they can use to enjoy their garden or roof terrace with complete freedom from care. For others, it means creating a safe place for their children to play. Our extensive range of artificial grass solutions can add a little extra to your life.

Let's get Inspired!

100%  Quality – Made in The Netherlands

Get the
best
out of
LIFE

excellence

Our landscaping products,
suitable for many applications,
all exceed our demanding
quality standards and stand
out from the crowd.

Landscaping Grass

Edel Grass has an extensive artificial grass collection for landscaping applications. All 'Made to relax!' Our in-company R&D department gives us the ability to design, produce, test and refine our own artificial grass products.

They are designed to offer high quality use during their entire life span. We strive to deliver products that perform in any climate and can be used in all weather conditions. Therefore we only use materials of the highest quality and work with EU quality suppliers that can meet to our demanding quality standards.

CHARACTERISTICS

- Natural & realistic appearance
- Year round uniform quality
- Comfortable soft touch
- UV-stable & extremely durable
- Easy to maintain

SUSTAINABILITY

- Ecologically responsible produced
- Safe to people & environment
- Meets the strictest environmental guidelines
- Produced with recyclable materials
- Avoids risk of soil contamination

APPLICATION & USE

Each landscaping product has it's specific application and use.
In general our landscaping collection is suitable for many purposes.
