Sports Grass

Edel Grass has an extensive artificial grass collection for sports applications. All 'Made to win!' Our in-company R&D department gives us the ability to design, produce, test and refine our artificial sports grass systems.

They are designed to offer high quality use during their entire life span. We strive to deliver systems that perform in any climate and can be used in all weather conditions. Therefore we only use materials of the highest quality and work with suppliers that can meet to our demanding quality standards.

CHARACTERISTICS

- The best alternative to nature
- Year round performance
- Uniform playing characteristics
- UV-stable & extremely durable
- Clear maintenance planning

SUSTAINABILITY

- Ecologically responsible produced
- Safe to people & environment
- Meets the strictest environmental guidelines
- Produced with recyclable materials
- Avoids risk of soil contamination

APPLICATION & USE

By involving us in your activities in an early stage, we are able to share our knowledge with you and help you approach your project the right way. We strive to be a partner for you, to support you in successfully building your projects.

RUGBY systems *made to win*

The intensive team sport

The exact origin of modern rugby is complex. A first form was played in France in the Middle Ages called Soule or Sioule. At the beginning of the 18th century, a kind of football was played at a school in Rugby, Warwickshire, where the ball had to be scored holding it under the arm. Rugby was introduced to many schools in England in the 19th century and the sport gained worldwide fame.

Rugby is an intensive contact sport in which a good surface is important in preventing injuries. When talking about rugby, people mostly refer to Rugby Union, which is played in leading countries. Generally speaking, a rugby field always consists out of long grass fibers filled with sand and performance infill, built on a shock-absorbing sub-base.

Edel Flashblade

Sand – SBR filled rugby system built on shockpad and bound or unbound sub-base

excellence

- Economic and durable rugby field**
- Flexible flash yarn shape**
- Good grip and torsion properties**
- Optimized ball roll speed and behavior**
- WR Certified systems**

Edel Flashblade

Performance filled

AFFORDABLE PERFORMER FOR INTENSIVE USE & PLAY

The Flashblade yarn fulfills the needs when a competitive rugby field system according to World Rugby standards is required. With it's 12.000 Dtex and matt finishing, Edel Flashblade perfectly covers performance infill and gives the field an outstanding natural look. Due to it's flash shaped yarn, the piles stay upright when played intensively. Built on a shockpad, the system complies with the requirements for rugby applications.

12.000/6 DTEX

Flash shaped yarn

345 μ M
Stabilizing core

- **Bi-directional resilience**
- **Perfect wear and tear**
- **Natural bicolor**

roll width
4m¹

Length according to installation scedule, full length to cover width of field.

Edel Hybridblade

Performance filled

MAINTENANCE FRIENDLY FIELD WITH NATURAL ESTHETICS

A mixture of diamond shaped yarns and tape. When a rugby field needs to offer good esthetics besides excellent performing capabilities, Edel Hybridblade delivers. It offers perfect conditions for intense and professional play. The combined yarns and a high Dtex of 18.700/7 make sure infill stays in place and excellent wear and tear is provided. Edel Hybridblade was used on run offs and in-goal-areas during last Rugby World Cup.

- **Dual shape resilience**
- **Eliminates infill splash**
- **Natural tricolor**
