Sports Grass

Edel Grass has an extensive artificial grass collection for sports applications. All 'Made to win!' Our in-company R&D department gives us the ability to design, produce, test and refine our artificial sports grass systems.

They are designed to offer high quality use during their entire life span. We strive to deliver systems that perform in any climate and can be used in all weather conditions. Therefore we only use materials of the highest quality and work with suppliers that can meet to our demanding quality standards.

CHARACTERISTICS

- The best alternative to nature
- Year round performance
- Uniform playing characteristics
- UV-stable & extremely durable
- Clear maintenance planning

SUSTAINABILITY

- Ecologically responsible produced
- Safe to people & environment
- Meets the strictest environmental guidelines
- Produced with recyclable materials
- Avoids risk of soil contamination

APPLICATION & USE

By involving us in your activities in an early stage, we are able to share our knowledge with you and help you approach your project the right way. We strive to be a partner for you and to support you in successfully building your projects.

TENNIS systems *made to win*

Just hit it

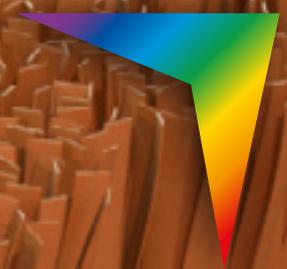

Tennis evolved from a ball hitting game in France called 'Jeu de paume'. It was king Louis X of France, a fanatic player, who built a first modern style indoor court around the 13th century which was later copied in palaces across Europe. Around 1600 the racket came into use and the game got its name from the French word tenez ('hold').

During the 18th and 19th century 'lawn tennis' gained popularity and the game developed. The lawn mower was introduced and now grass could also be used for tennis courts. In 1872 the first tennis club was founded in Leamington Spa, England. Modern tennis is played on a variety of surfaces such as grass, clay or hard courts. Artificial grass nowadays is intensively applied and one of the most used tennis surfaces.

Edel Advantage Red Court

All weather red sand filled high performance tennis surface

Built on bound or unbound sub-base

excellence

Premium tennis court
Designed for all weather play
Year round performance
The best alternative to clay
ITF classified court pace - 1 Slow

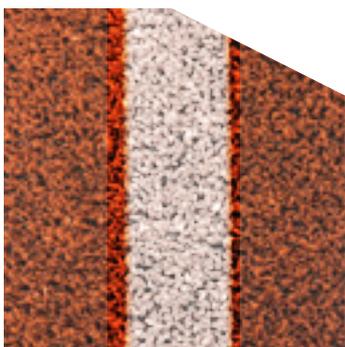

> edelgrass.com

Edel Advantage Red Court

Red sand filled

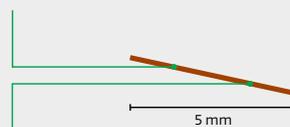

ALL-WEATHER COURT, THE ULTIMATE ALTERNATIVE TO CLAY

Combining the playing characteristics and appearance of clay with the benefits of an all-weather playing surface, Edel Advantage Red Court (ARC) has only to be installed on a stable, free draining base. There is no requirement for watering of the surface, so the high cost of a sprinkler installation is avoided. As with traditional clay courts, Edel ARC allows players to slide in a controlled motion allowing coverage of the whole court area.

5.000/1^{DTEX}

Fibrillated tape

110 μM

- **Natural looking court**
- **Playing characteristics of clay**
- **No sprinklers or water needed**
- **Visible ball prints**

**roll width
4m¹**

Length according to installation schedule, full length to cover width of field.

Edel Elite LSR

Sand filled

AFFORDABLE AND PROVEN QUALITY TENNIS SYSTEM

A sustainable, player-friendly and affordable tennis solution. LSR courts are installed on top of a structure designed according to the standards of (inter)national sports associations. The LSR (Low Slide Resistance) yarns remain flexible even at temperatures below zero, offering good playing characteristics the entire year. The system is sand filled. Players can easily pivot, turn and slide with a reduced risk of injuries.

- **Leading sand filled tennis court**
- **Integrated play lines**
- **Maximum durability**

roll width
3,72 m¹

Length according to
installation schedule.

Edel Elite SuperSoft

Summergreen/white/terracotta sand dressed tennis court

Preferrably built on bound sub-base

excellence

Faster play

Low in maintenance

No dragging after playing

Luxurious appearance

Minimal sand infill required

Edel Elite SuperSoft

Sand dressed

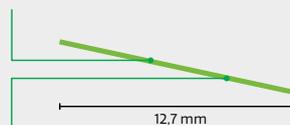

DISTINGUISHING ALL TIME SUPER PERFORMER

Distinguish your court with high quality artificial Edel Elite SuperSoft tennis grass. Micro curled polyethylene fibres provide a very even and non-directional playing surface. The system contains only little sand, made completely invisible by the curled fibres. The turf allows optimal pivoting and sliding, making it a super performer. After professional installation on a stable base, Edel Elite SuperSoft requires relatively low maintenance.

7.300/1_{DTEX}

Fibrillated PE tape

63 μ m

- **Thermofixed Knit-D-Knit yarn**
- **Low pile sand dressed system**
- **Full grass aesthetics**

roll width
3,72 m¹

Length according to
installation schedule.

Edel Elite Paddle Pro

Sand filled

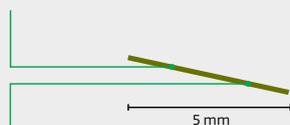

THE MULTI USE SOLUTION FOR TENNIS AND PADEL

Edel Elite Paddle Pro is developed for all-weather paddle courts and can be customised to every single location. The specific playing performance makes the system also suitable for tennis courts, offering a unique multi-use solution. The Edel Paddle Pro system has to be installed on a stable, free draining base and will require relatively low maintenance. The system has a superb water permeability with uniform and predictable ball bounce.

PADEL systems *made to win*

The 2 vs 2 fun game

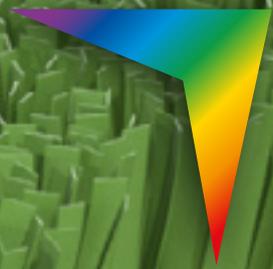

Padel saw daylight in Mexico in 1969. Since then it became popular in several countries in south America, such as Argentina. In Europe, for years, Padel was first and mainly practiced in Spain. Since a few years it now gains much popularity as well in Europe as other continents.

The racket sport Padel is mostly played in couples of 2 against 2 on an enclosed court of steel and glass. It sizes 1 third of the size of a tennis field. The game style and rules of Padel differ and can not be confused with Paddle tennis, which is mostly played on courts in USA and Canada. For more information visit [PadelFIP.com](https://www.PadelFIP.com).

Edel Padel MF Top

Field green sand filled padel system

Built on bound sub-base

excellence

Designed for Padel
Perfect slide conditions
Good ball rebound
No dragging after playing
All weather solution

Edel Padel MF Top

Sand filled

COMFORTABLE PADEL SURFACE WITH HIGH WEAR RESISTANCE

Based on our experience, Edel Grass developed this artificial grass surface especially for Padel. It offers players a comfortable floor with high wear resistance. The shape and width of the yarn, combined with the high density provides the perfect surface for players and offers ideal ball rebound. Padel MF Top has an appealing "natural grass" aspect that invites to play!

- **Dense fibre filling**
- **Natural appearance**
- **Optimal wear resistance**

roll width
4m¹

Length according to installation schedule, full length to cover width of field.

Edel Padel XT Club

Sand filled

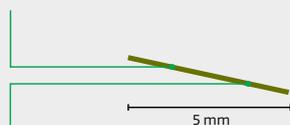

THE ALL WEATHER SOLUTION FOR EVERY PADEL COURT

Edel Padel XT Club is suitable for all-weather padel courts and can be customized to every single location. The perfect stability, optimal playing properties and slide conditions make the system perfect for padel courts at any club. It will require relatively low maintenance. The combination of the sub-base, yarn and sand infill results in a system with good water permeability, a uniform and predictable ball bounce.
